

# Post-Race Report | Darlington Raceway: Kaulig Racing

## GOODYEAR 400

### Justin Haley, No. 31 LeafFilter Gutter Protection Camaro ZL1

Start: 29th / Stage 1 Finish: 20th / Stage 2 Finish: 27th / Finish: 3rd

“This isn’t the best car we’ve brought to the racetrack unloading after practice. But we just kept after it all day. Some great strategy from this No. 31 LeafFilter Gutter Protection Chevy team. We had a good restart there at the end and we just kind of hung on. We didn’t have a third-place car, but it’s a great finish. This was my best Cup finish besides that win. To do it here at Darlington (Raceway), to finish third, it’s pretty special. It was a good run. We’ll take this to next week and see what we can do at Kansas (Speedway).”

### Daniel Hemric, No. 16 AG1 Camaro ZL1

Start: 24th / Stage 1 Finish: 26th / Stage 2 Finish: 32nd / Finish: 31st

“The lady in black was not kind to us this

weekend. We got some damage early and lost quite a few laps trying to fix it. I appreciate all the hard work on pit road to get us back out there. I thought we’d be ok, but we had some engine issues that ended our day early. We haven’t had the best luck, but we are building and learning every week.”

## Mahindra ROXOR 200

### Landon Cassill, No. 10 Voyager Chevrolet

Start: 13th / Stage 1 Finish: 8th / Stage 2 Finish: 14th / Finish: 6th

“Tire strategy was definitely the name of the game. I felt like I was protecting my rear tires all race. I’m proud of the effort from everyone to get another top-10 finish. We definitely got everything we could out of our No. 10 Voyager Chevy.”

### AJ Allmendinger, No. 16 Action Industries Chevrolet

Start: 5th / Stage 1 Finish: 6th / Stage 2 Finish: 8th / Finish: 8th

“We fought hard all day in our No. 16 Action Industries Chevy. We didn’t have the speed or grip we needed to contend at the end, but to still get by with a top-10 finish shows that we maximized everything we had. We will be better for the next time we come to Darlington.”

### Daniel Hemric, No. 11 Cirkul Chevrolet

Start: 11th / Stage 1 Finish: 12th / Stage 2 Finish: 30th / Finish: 10th

“We definitely fought some adversity today. We lacked rear grip all day and ended up knocking a crush panel loose. Our guys did a great job on pit road to get me fixed up and back up towards the front. I’m proud of the effort from everyone on this No. 11 Cirkul team for a top-10 finish after what could have been a lot worse.”
